1. Number: 12 - 2
2. Team Name: Stonks
3. Members:
    a. Grant DeBernardi: Grant-DeB
    b. Danny Toy: dannytoy
    c. Guilherme Avila Loges: guilhermeavlog
    d. Josh Lettau: jlettau12
    e. Luke Robinson: luker-robinson2
    f. Peter Benda: peterbenda
4. Application Name: StockSandbox
5. Application Design: Our application would feature a fictional stock market using fake money, the stocks based on real stocks for the prices and fluctuations. When a user logs in they are given a certain amount of starting cash which they can use to invest in the market. The application will track their stocks, allowing them to cash out whenever they want. Their profits or losses will be tracked as well, allowing them to see how effective they have been.
   There will be pages for login, registration, portfolio and user profile, watchlist and order history, and a leaderboard where the top investors are ranked. These pages will be connected via a header UI, allowing users to easily navigate through the page.
6. Audience: Novice investors looking for a platform to practice trading
7. Vision Statement: A world where everyone can experience trading no matter their financial background or level of experience
8. Version Control: github
9. Development Methodology:
    a. Using Trello for tracking/organizing progress.
10. Communication Plan:
    a. Using Discord as the main platform for communication and separate meetings from weekly meetings if needed.
    b.
11. Meeting Plan:
    a. Wednesday ~3:10pm After Lab (In-Person)
    b. Team meeting: Through discord calls
   Grant:
   Danny: MTuTh - after 2pm, W - after 5pm, F - full day, SaSu - unavailable for call
   Guilherme: MWF 2-5, Tuesday & Thursday 2-4
   Josh: Tuesday & thursday before 5, MWF 2 - 4, weekends during the day
   Luke:
   Peter: Tuesday, Thursday, Friday b4 5
